Cavities Between Teeth		
Cavities in Pits and Fissures		
Cavities on Easy To Reach Surfaces		
Number of Decayed Teeth		
Number of Missing Teeth		
Number of Filled Teeth		
Number of Sealants		

SupertooshNDK Inc. is an oral health research charity to end tooth decay, which even after fluoridation, is still our most common disease affecting over 11 million Australians each year where resident plaque bacteria change any carbohydrates like sugar in food to acid that demineralises tooth, which after many episodes that exceed saliva and fluoride remineralisation result in cavities.
